

2CFM Vacuum Pump with Gage

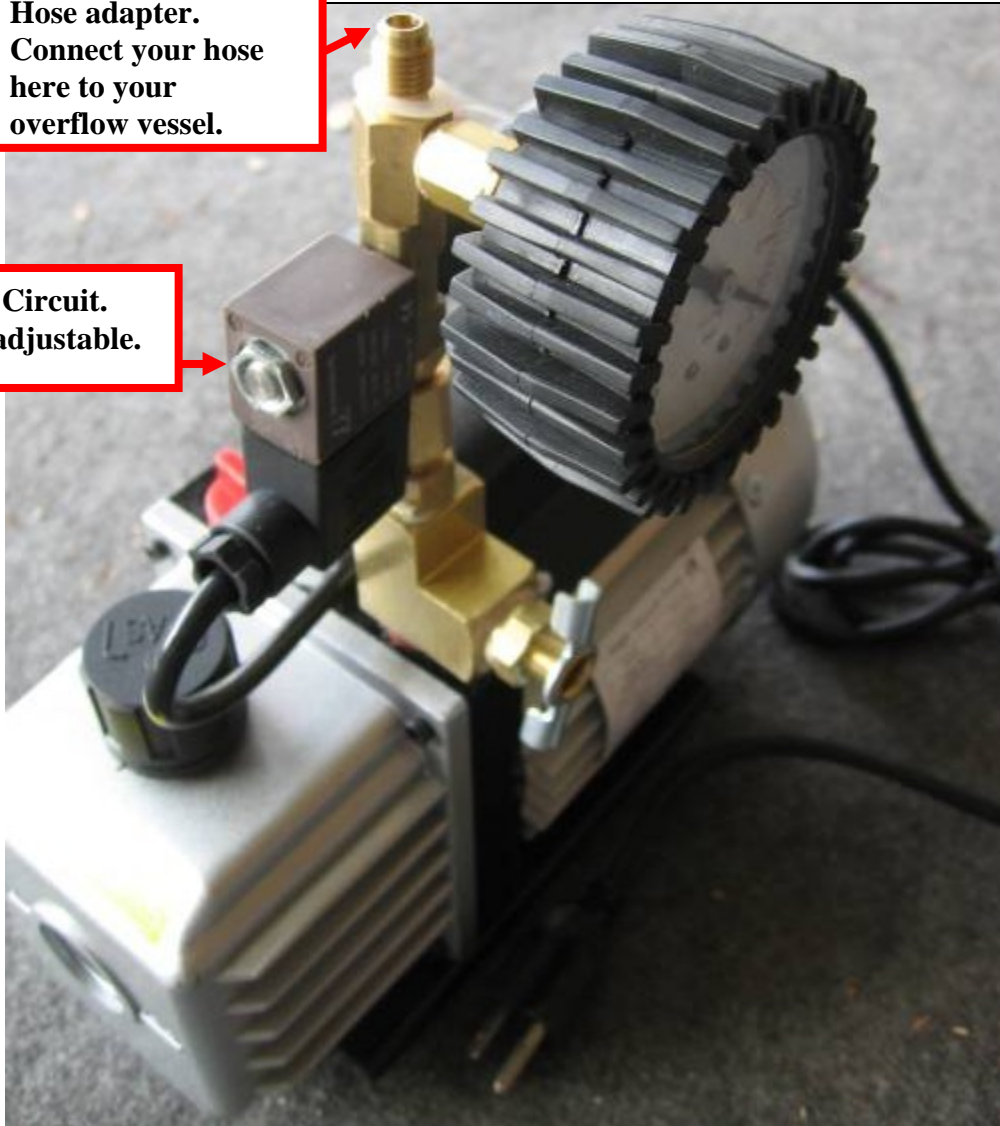

Turn the brass control valve on front of unit to control the amount of vacuum to your project.

Always connect your pump to an overflow protection container to prevent wine and/or fluids from being pulled into your pump. Operation without an overflow protection device will void your warrentee.

The ValleyVintner™

**Hose adapter.
Connect your hose
here to your
overflow vessel.**

**Auto Limit Circuit.
This is nonadjustable.**

The unit has an auto vacuum limiting device to prevent over heating of motor. This set by the factory and is non adjustable by the user.
